1. **Status:** Please all the replies and correspondence should be addressed to Examiner's new art unit 2629. Receipt is acknowledged of papers submitted on 06-21-2007 under petition to revive abandonment of instant application and amendments, which have been placed of record in the file. Claims 1-3 and 5-15 are pending in this action and claims 4,16 and 17 are cancelled.

2. Applicant has filed petition on 06-21-2007 to revive the instant application after abandonment of the instant application on 03-21-2007. The petition has been granted by USPTO petition department, on 01-10-2008. Therefore prosecution of the instant application is reopened. Claims 1-3 and 5-15 are pending in this action and claims 4,16 and 17 are cancelled.

Response to Amendment

3. Applicant has cancelled claims 4,16 and 17. Applicant has added objected dependent claim 4 to independent claim1 and adding allowable limitations of claim 4 to independent claim 6 to expedite allowability of the instant application. Applicant's arguments filed on 06-21-07, under remark/arguments regarding allowable limitations "a slew rate limiting at least a portion of said gamma corrected video drive signal; the further steps of: deinterlacing said video drive signal to provide a deinterlaced video signal; color space converting said deinterlaced video signal; and frame rate multiplying said color space converted video signal said further steps taking place prior to gamma correcting said frame rate multiplied video drive signal" are persuasive; as after further extensive search in prior art; USPGPUB and consideration, amended independent claims 1 and 6, do overcome the prior art rejection mailed on 06-21-2006; which puts application number 09892347 in condition for allowance.

Allowable Subject Matter

4. Claims 1-3 and 5-15 are allowed.

5. The following is an examiner's statement of reasons for allowance:

6. Applicant has cancelled claims 4,16 and 17. Applicant has added objected dependent claim 4 to independent claim1 and adding allowable limitations of claim 4 to claim6 to expedite allowability of the instant application. Applicant's arguments filed on 06-21-07 are convincing. As argued by on 06-21-07, in remarks under remark/arguments page 5, paragraphs 1-3; prior art of Willis et al. (US 20002/0126079 A1) with all of the other prior art cited on 892's 1449's, searched in NPL and searched in PGPUB, fails to recite or disclose all the other limitations of independent claims in combination with uniquely distinct features represented by underlined bold claim limitations recited below;

a slew rate limiting at least a portion of said gamma corrected video drive signal; the further steps of: deinterlacing said video drive signal to provide a deinterlaced video signal; color space converting said deinterlaced video signal; and frame rate multiplying said color space converted video signal said further steps taking place prior to gamma correcting said frame rate multiplied video drive signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
